A results-driven Senior Software Engineer and freelance website developer with 4+ years of experience in frontend and full stack web development. Skilled in building responsive, pixel-perfect web applications using HTML5, CSS3, JavaScript, React.js, PHP, and MySQL. Passionate about clean UI, performance optimization, and user-centric design, with hands-on experience delivering production-ready web solutions across product-based and enterprise environments.

## Work Experiences

**Senior Software Engineer** — The Akshaya Patra Foundation | Oct 2026 - Present

Leading development of the foundation's donation websites end to end, from WordPress customisation and donation workflows to integrations, performance and day-to-day reliability.

**Key Responsibilities:**

- Building and maintaining responsive donation websites with pixel-perfect HTML5, CSS3, and JavaScript implementation.
- Customizing WordPress themes and plugins to support donation workflows and organizational requirements.
- Integrating REST APIs, payment and third-party services.
- Optimizing website performance, cross-browser compatibility, and mobile responsiveness.

**Full Stack Developer** — The Akshaya Patra Foundation | Aug 2025 - Oct 2026

Managed and maintained the organization's donation websites: frontend development, WordPress customization, custom UI features with JavaScript and jQuery, and responsive, user-friendly web experiences. Awarded **"Extra Mile Award"** (February 2026) for outstanding dedication in delivering impactful web solutions for the foundation.

**Freelance Website Developer** — Self-employed | Mar 2025 - Present

Designing and building websites for small businesses, startups and organisations in India, the USA, Australia, Canada and the UAE.

**Key Services:**

- Business and company websites on WordPress and custom HTML, CSS and JavaScript.
- E-commerce stores on WooCommerce and Shopify with payment gateway integration.
- Landing pages, website redesigns, speed optimisation and maintenance.

**Frontend Developer** — Labtron | Sep 2024 - Aug 2025

Worked as a Frontend Developer at a product-based company, contributing to modern web applications and internal product platforms. Focused on building responsive, high-quality user interfaces using ReactJS, JavaScript, HTML5, CSS3, and Tailwind CSS, while ensuring performance and usability across devices and browsers.

**Key Responsibilities:**

- Developed scalable and reusable UI components using ReactJS.
- Converted UI/UX designs into responsive, pixel-accurate web pages.
- Integrated REST APIs and handled dynamic data rendering.
- Optimized frontend performance and fixed cross-browser UI issues.
- Collaborated with backend and design teams for smooth feature delivery.

## Education

BTech in Computer Science Engineering, GIET University, Gunupur
(2019 - 2023)

### Junior Web Developer

Smartinfosys.net | Oct 2022 - Sep 2024

Started my professional journey as a Junior Web Developer, working on multiple client websites and frontend projects. Focused on building responsive and user-friendly interfaces using HTML, CSS, JavaScript, and Bootstrap. Delivered production-ready pages from design files while maintaining clean code and cross-browser compatibility. Awarded **"Star Performer of the Year"** for consistent performance and delivery quality.

**Key Contributions:**

- Developed responsive website pages from UI/UX and design mockups.
- Built interactive features using JavaScript and Bootstrap components.
- Fixed UI bugs and improved layout consistency across devices.
- Maintained clean, structured, and reusable frontend code.

## Projects

### SquareFeetSeva Website

WordPress

**Technology:** WordPress, PHP, HTML, CSS, JavaScript

Developed a donation-driven WordPress website for SquareFeetSeva, an ISKCON initiative in Hyderabad. Built custom page layouts and a dedicated seva contribution flow with clear calls-to-action, secure plugin-based donation integrations, and a responsive layout that keeps the donation journey smooth across devices.

### RaiseShield Solutions Website

WordPress

**Technology:** WordPress, PHP, HTML, CSS, JavaScript

Designed and built the full website for RaiseShield Solutions, a cybersecurity services company, as a freelance project. Created a custom, trust-focused WordPress design with service-led page architecture, lead enquiry forms, and backend configuration tuned for performance, stability and security.

### Budget Petrol Website

React.js

**Technology:** React.js, JavaScript, HTML5, CSS3

Developed the frontend of Budget Petrol using React.js, with a focus on reusable components, dynamic routing, and state management. Ensured optimized rendering and seamless UI performance. Implemented responsive layouts and cross-browser compatibility for a smooth user experience across all devices.

### VJB Group Website

WordPress

**Technology:** WordPress, PHP, JavaScript, HTML, CSS

Created and customized the VJB Group website using WordPress. Worked on theme customization, PHP integration, and JavaScript-based interactivity. Focused on frontend refinement, performance optimization, and enhancing mobile responsiveness to deliver a modern business website.

### Apex Exteriors Website

Wix

**Technology:** Wix, HTML, CSS, JavaScript

Designed and developed the Apex Exteriors website using Wix. Customized frontend using embedded HTML, CSS, and JavaScript to match the brand's visual identity. Focused on interactive elements, layout responsiveness, and optimizing site speed for a professional user experience.

### Labtro Scientific Website

Static Website

**Technology:** HTML, CSS, JavaScript, PHP

Built a static, professional laboratory equipment website for Labtro using HTML, CSS, JavaScript, and PHP. Ensured clean code structure, pixel-perfect design implementation, and responsiveness across all screen sizes. Also focused on frontend load optimization and usability.

Higher Secondary Education in Science, Peoples College, Buguda
(2017 - 2019)
